INLAND EMPIRE / DESERT CHAPTER

Vendor Display Rules and Regulations for the 2012 MSA Conference and Equipment Show

The 2012 MSA Vendor Display area will be located indoors at the Fantasy Springs Conference Center. Be aware that pipe and drape as well as a vendor sign for each booth will be provided at no additional cost to each vendor. Due to the fact that this will be an indoor show, there are various rules and regulations that vendors will have to adhere to.

- **No vehicle or equipment placed inside the conference center will have more than 1/8th of a tank of fuel.** This also includes any type of portable engine, gas or diesel.
- No engine will be started at any time during the equipment show.
- All fuel caps will be sealed once positioned inside the conference center.
- All batteries will be disconnected.

These rules above are a requirement of the local Fire Marshall.

Plastic sheeting will be placed underneath each vehicle in the area of the engine and transmission as a precaution to protect the conference center floor.

Because this equipment show is indoors, there will be time frames on Tuesday (the day before the show) to set up all vehicles and equipment inside the conference center. Scheduled times will be given to the exhibitor approximately 2 weeks prior to the conference. It will be critical that you adhere to this schedule. There is only one loading area into the conference center to get all booth spaces setup to the assigned vendors. The conference center will be filled from front to back. Once pipe and drape is set, if a vendor has not arrived by their scheduled time frame, that vendor could forfeit his original space or spaces and be located to another area within the conference center. Vendors that are only carrying in their product will be given a 4 to 6 hour window to set up their booths.

All vendors may bring their own tables and chairs with them. Innovative Expo will be the show services provider and you may rent any of the items you need from them, but is not mandatory. If you need electrical power you will need to contact Innovative Expo for this type of service. No other show service companies will be allowed. Once you have registered, Innovative will send you a complete package of the services they provide at very reasonable rates.

MSA 2012 Conference Display Chairman

Chris Smith
